

Exhibit 8

2010 Washington Health Program HEDIS® Measures

NOTE: HCA will not require Washington Health Program (WHP) HEDIS® Measures for the period July 1, 2010, through December 31, 2010. If CONTRACTOR has already contracted to submit 2010 Basic Health HEDIS® Measures to the Health Care Authority, CONTRACTOR is not required to resubmit. It is preferred that data submitted for both BH Subsidized and WHP be segregated; however, if not possible, please submit together and separate from other lines of business. The HCA's preference is that HEDIS® Measures be specific for its population. If segregated data is not available for 2011 plan year, please note in your submittal. Also, please be advised segregated data will be expected for the 2012 plan year.

For 2011, the CONTRACTOR shall report the following NCQA Data Submission Tool, including audited measures in accord with the current HEDIS® Technical Specifications and official corrections published by NCQA for WHP.

If WHP is not included in the CONTRACTOR'S product line that is reported as the "commercial" rate, then the product line which includes WHP must be counted, audited, and reported separately.

If Contractor does business in multiple states, HCA expects Washington State data.

CONTRACTOR will report the following HEDIS® measures:

1. Comprehensive diabetic care Hybrid *method only*
2. Follow-up after hospitalization for mental illness (30 day follow-up only)
3. Cholesterol management after acute cardiovascular events (screening rates)
4. Antidepressant medication management (Acute Phase and Continuation Phase)
5. Controlling High Blood Pressure

For calendar year 2011, all data will be submitted by June 15, 2012, by providing HCA access to NCQA's Interactive Data Submission System (IDSS). Notification of data submitted shall be e-mailed to: [TBD](#)
